Some of the key features of our Bank Management System

- An Admin Account to control the users
- Creating a New Bank Account which will be password protected.
- Showing Existing Bank Account informations
- Showing Existing Bank Account's Mini-Statement with transaction ID.
- Updating Existing Bank Account **=>**
    a. Name
    b. Phone
    c. E-mail
    d. Address
    e. Account Balance
- Allow user to withdraw money
- Allow user to deposit money by Admin's Permission
- Deleting Existing Account

To build this project we will be using function, array, structure , file operations and many more specially 'CRUD'!
