Some of the key features of our Bank Management

- An Admin Account to control the users
- Creating a New Bank Account which will be password protected.
- Showing Existing Bank Account informations
- Showing Existing Bank Account's Mini-Statement with transaction ID.
- Updating Existing Bank Account =>
  a. Name
  b. Phone
  c. E-mail
  d. Address
  e. Account Balance
- Allow user to withdraw money
- Allow user to deposit money by Admin's Permission
- Deleting Existing Account

To build this project we will be using function, array, structure , file operations and many more specially 'CRUD'!
